Residual Inventory Contract RD-91, [redacted] 25X1

REF : Memorandum to Chief, Engineering Division, OC, from Chief, Supply Division, OL, dated 22 November 1957, same subject

1. The residual material list, [redacted] number H2061, has been carefully reviewed by this Division. We have no information to indicate that the list is not accurate or complete. 25X1

2. In view of the fact that the equipment produced under this contract was a prototype design only, and it is not anticipated that further production will be made, it is requested that all material of the residual inventory be brought into the Agency warehouse and [redacted] the project engineer for this project, be notified upon arrival. This material will be evaluated in conjunction with the one (1) prototype system now being examined. Useful items will be turned into stock and other material will be disposed of by other means. 25X1

3. This matter was discussed in a telephone conversation between your [redacted] and it was understood that many items contained in this material list are peculiar to the prototype model and will not be stocked for support of the system. 25X1

[redacted] 25X1

Suggested by [redacted] 25X1

I understand sending request that residual be shipped in. This would place action on [redacted] who might then document plan for reclaiming overseas and residual disposition. RID 25X1
